Art Unit: 1644

1. Claims 1-7 and 21-28 are pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9-29-2003 has been entered.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 90/09804.

The '804 patent teaches the use of genetically engineered Ig's, wherein the resulting Ig has Fc receptor binding region and a variable region replaced with an antigen associated with autoimmune disease wherein said Ig is to be used to down regulate the autoimmune disease (see abstract, page 5 lines 26-33, in particular).

The claimed invention is anticipated by the prior art teachings.

5. Claims 4-7 and 24-28 are objected to for being dependent upon rejected claims.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick J. Nolan whose telephone number is 703-305-1987.
7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Y. Chan can be reached on 703-308-3973. The fax phone number for the organization where this application or proceeding is assigned is 703-308-4912.
